The origin of CROPS

"To harvest crops" --Thinking of crops in the context of agriculture.

Seeds are sown. They take root and grow. With great care and labor the farmers harvest the crops.

We assemble new and unique ideas.

We select those that merit our attention and design consideration.

We Innovate, simplify, and craft products that carry our name.

CROPS was founded in 1996 based on this conceptual metaphor.

CROPS—Our Ideas
Our crops, in other words our products, are well-developed,
This is due to the efforts of our outstanding designers, technicians and manufacturers.
We want to provide products that amaze and delight the user.

CROPS—Our design
The appearance isn't anything outrageous.
The essence = simplicity
We strive to apply our design philosophy across our product line. Easy to use designs that exhibit simple, functional beauty.
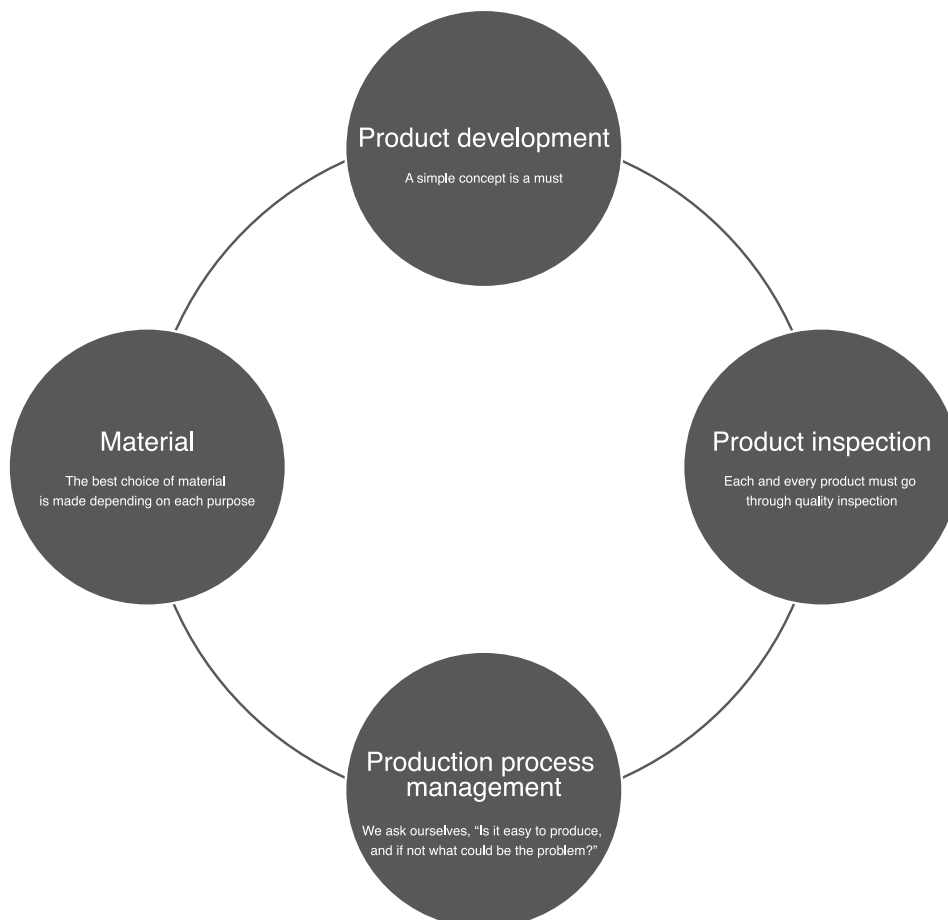

CROPS—Our craftsmanship
Our team works in close collaboration with local technicians and manufacturers.
Through mutual trust we are able to pursue product designs and follow processes that will yield a quality CROPS product.
Attention to the smallest details and continuous improvement of the design is part of our process.
We'll produce prototypes based on our initial designs. We'll field test them to evaluate form, fit, and function.
We'll refine the design using real world feed-back. Through these iterations,
we can fully develop and proudly deliver CROPS products.

Product development
A simple concept is a must

Product inspection
Each and every product must go
through quality inspection

**Production process
management**
We ask ourselves, "Is it easy to produce,
and if not what could be the problem?"

Material
The best choice of material
is made depending on each purpose

Product concept

PRO series CROPS

The CROPS flagship model beats others in attractiveness.
When we make our locks, we begin with designing cylinders.
The rigidness is present, and yet a shaped head is made possible.
Not only does it protect your bicycle from theft, it's easy to use and
also feels comfortable when you push the key into the lock.
Each time you use the key, you feel a sense of satisfaction.
This is what CROPS Pro Series is all about.

CROPS

With our main products being locks and lights,
we offer general bicycle accessories.
We have products of varied specifications and colors to meet your needs
in all cycling environments from road racing to urban cycling.
Our product lineup will satisfy cyclists of any kind,
whether he/she is a road racer or an urban cyclist.

New **CROPS**

Old **crops** **crops** **crops pro**

CROPS celebrates its 22nd anniversary since its establishment as a brand. To mark this milestone and aim for further growth, we are updating our corporate logo.

The iconic scorpion mark, which has been beloved for years, is being transformed into a modern and user-friendly symbol. Additionally, by unifying the font style of the CROMO logo, owned by our group company CROMO Inc., with the new CROPS logo, we aim to enhance the brand image of the entire group.

This change will pave the way for the development of innovative products, allowing us to deliver even more surprising and exciting offerings to our customers.

We look forward to your continued support as we embark on this new chapter.

FOLDABLE ULOCK
benlock™

"BENLOCK" is sturdy and portable the latest foldable U-lock.

-Break through the common sense of bicycle locks-

"BENLOCK™" which is sturdy and portable! the latest foldable U-lock. The key to choosing a lock is the balance of weight, ease of handling, and security performance. The stronger the lock, the better the security performance, but the lock is proportionally heavier and harder to handle. As a result of pursuing both strength and ease of handling, it became a very well- balanced lock, which is the "BENLOCK™". There have been many cases of people finding and returning stolen cars because they had GPS tracking system installed. The BENLOCK™ can equipped with a smart tag into the bracket which is the most advanced anti-theft measures to protect your valuable bicycles.

THE BRACKET DESIGNED WITH SMART TAG STORAGE SPACE

In addition, the smart tag can be hidden in a special case to provide the most advanced security measures. The BENLOCK™ bracket can be mount to the bicycle body, concealing the smart tag in a hidden location.

The angled chain

Characteristics and strength
Strong steel chain specially heat-treated for reinforcement.

A 5-digit combination lock (Head type : K5)

The CROPS original double-locking system
which uses two balls locking into two blades defies the traditional locking systems.
The unique 5-digit combination lock is equally spaced and lined up flat for precise setting. YRRDREDDOORKDOKO
unlike what happens with the ordinary 5-digit combination locks.

The Dimple key (Head type : K4)

The supplied dimple key is slightly bigger than a regular key so it fits comfortably in your hand.
Double dimple blades
Anti-twist double blades
Designed for very smooth insertion.

Keyhole
Connecting part for K4 series
Enables connection to optional K4 series.

Why do double wired cable provide excellent security?

When attempting to cut the double wired cable with tools such as pliers, wire ② cannot reach the blade near the pivot where the cutting force is greatest, and this wire ② gets in the way, thus making it difficult for wire ① to be cut.

※Proven to show the above result when using small tools such as pliers or nippers. The same results may not be anticipated when using bolt clippers or wire cutters.

Cross-section of the double wired cable

V150 BELL COMBO

CROPS has released a new battery-powered (2 x AA) light specifically designed for entry-level users. It provides a brightness of approximately 150 lumens, offering sufficient illumination despite its compact size. The body is constructed with polycarbonate, ensuring durability. Additionally, it features CROPS' original universal bracket, called "UltiFix," which allows for the attachment of the original bell. This design combination allows the bell to be seamlessly integrated with the bracket, resulting in a discreet appearance.
